Programming Languages: C#, Java, Python, HTML, CSS, SQL

EDUCATION

Kansas State University

Expected Graduation - May 2027

BS Computer Science, Minor in Business

Relevant Coursework

- CIS 560 Database System Concepts Spring 2026
- CIS 400 Object-Oriented Design, Implementation, and Testing Spring 2025
- STAT 510 Introduction Probability & Statistics Fall 2025
- MIS 670 Social Media Analytics & Web Mining Fall 2025
- CIS 300 Data & Program Structures Fall 2024

WORK EXPERIENCE

Software Developer Intern- *Textron Aviation*(Wichita, KS)

June 2026- Present

- Collaborate with cross-functional stakeholders to translate business requirements into scalable features for an enterprise Blazor web application modernizing legacy HR processes.
- Design and develop full-stack functionality using C#, Blazor, SQL Server, and REST APIs within a layered architecture, integrating enterprise applications with SQL databases.
- Automate HR workflows by building a unified application that synchronizes data with SAP, eliminating duplicate manual data entry and improving data accuracy.

Teaching Assistant - *Kansas State University*(Manhattan, KS)

August 2025- Present

- Assisted professor with teaching and supporting 100+ students in Intro to Computer Science courses.
- Hold weekly office hours to explain programming concepts in Python and help students debug assignments.
- Graded projects and exams with accuracy and consistency, ensuring fair evaluation and timely feedback.

IT Intern- *Christensen Farms* (Sleepy Eye, MN)

May 2025 - August 2025

- Managed a project to deploy 100+ laptops and desktops for farmers and employees across multiple sites.
- Used Microsoft Intune for asset tracking and inventory management for 100+ devices.
- Installed custom software using admin credentials and completed all sprint tasks with 100% success.

IT Student Consultant- *Kansas State University Library* (Manhattan, KS)

September 2024 - June 2025

- Resolved an average of 15+ technical support issues daily, ensuring minimal downtime for students and faculty.
- Diagnosed login and account access issues, ensuring users regained access to critical university systems quickly.
- Recognized complex issues beyond the scope of initial support and escalated an average of 15+ tickets per week to specialized IT teams, minimizing downtime and ensuring efficient resolution.

PROJECTS

Dairy Barn Kiosk Application (C#, WPF, Object-Oriented Design) |

2026

- Developed a fast-food kiosk application for a fictional restaurant, DairyBarn, focusing on Object-Oriented Design and Implementation.
- Designed objects for each menu item and ensured code reusability.
- Utilized xUnit for unit testing to validate functionality and maintain software quality.

Real-Time Chat Application (C#, Windows Forms, Websockets)

2026

- Built a client-server chat application in C#/WinForms using WebSockets for real-time messaging across multiple concurrent chat rooms.
- Implemented a friends system and room-based message routing, handling concurrent client connections on a single server instance.
- Collaborated with a team of 4, using Git/GitHub for version control

Basketball League Management System(C#, WPF, SQL Server)

2026

- Built a C# WPF desktop app to manage players, games, and stats using a layered architecture with a repository pattern to decouple UI from data access.
- Designed a 7-table SQL Server database and implemented all CRUD operations via stored procedures, using ADO.NET delegates to build commands and map results to C# models
- Collaborated with a team of 3, dividing work across UI, data access, and database layers, and managed version control using Git/GitHub.

SKILLS & AWARDS

- Tools & Software: Git, GitHub, Azure, Visual Studio, Visual Studio Code, Microsoft Intune
- Frameworks: Blazor, WPF, WinForms, .NET, xUnit
- Awards: KS-LSAMP Emerging Scholars Award(2024-2025), Mounday (Don/Cleo) Grad. Scholarship(2024), Limestone Scholarship(2023-Present), E. William Ulrich Scholarship(2026), John H. Bateman Scholarship(2026)
